

# LWD

LEARN MORE

## BENEFITS OF USING LWD

THE LWD YOU KNOW PLUS MORE

Streamline the documentation process and quickly transfer bore data from any device, anywhere, just like that.

LWD Cloud gets you access to your drill data via the cloud, so you can quickly share it with clients and customers.

## WHAT IS LWD?

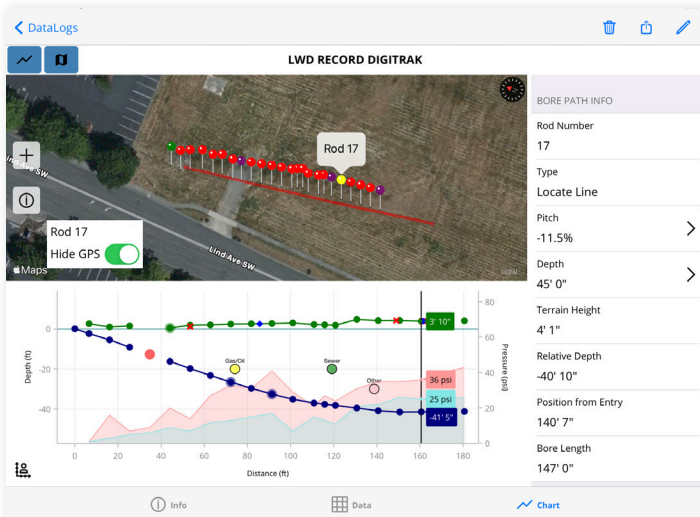

LWD or Log While Drilling is a free software product that makes it easy to record and report your rod-by-rod bore data. LWD is available for Falcon F5+ locators and is a standard function with Falcon F5 and Classic F5 systems.

## WHATS NEW WITH LWD

LWD now allows you to do it all, on any device, from anywhere. With LWD you can edit your rod-by-rod data, add utilities and annotations, and email completed LWD files right from the mobile app. No more reliance on the desktop software to utilize the more advanced LWD features. Now your field personnel have all the tools they need to create professional, polished as-built reports at their fingertips.

## INTEGRATED WITH LWD CLOUD

LWD Cloud is a DCI exclusive cloud storage solution for your LWD files. Available via subscription, with free trials offered via your local DCI Dealer or by contacting our 24/7 customer support team. LWD Cloud serves as your centralized hub for all your recording, annotating, and reporting needs. Access, view and edit your LWD files in real time from any device, from anywhere.

Tablet view of chart, iGPS and rod data.

## LWD FEATURES IN ACTION

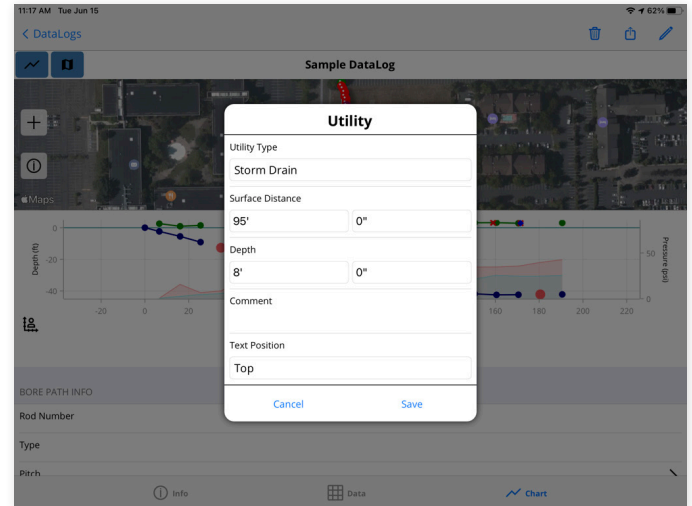

WORK WITH CONFIDENCE

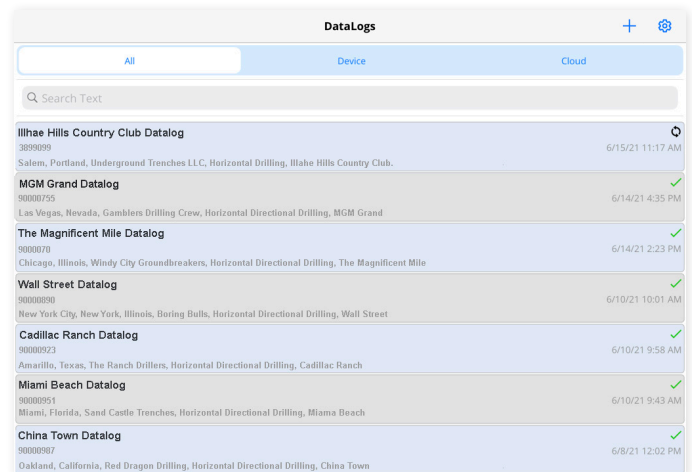

LWD is integrated into the locating process, making it faster and more accurate to capture your bore data.

Use your Mobile device to view and edit detailed information onsite, including GPS, pitch, depth, and fluid pressure data.

Full editing and annotation capability.

Easily find your jobs in the cloud or on your device.
